// **OUR CLIENTS ARE OUR NUMBER ONE PRIORITY.**

ABOUT US

Established in 2010, Persada Silver has been continually developing and creating industrial beneficial products and services for clients. We engage in selling corrosion prevention product which includes VCI papers and VCI films under BRANORost, BRANOfol, Ferrogard, Multiguard and SilverCorr brands (which collectively we call BRANOguard).

We seek to respond to the challenges of corrosion protection for the future: Locating local production of anti rust film, making the right coolant for production

efficiency, creating effective non-sticky rust-prevention oil and adding a moisture absorbent line. All attempts are ensuring your products are corrosion-free.

By joining our worldwide BRANOguard team, we are becoming your solution in providing on site corrosion issues and technical back up across the world. Our know-how in developments and manufacture temporary corrosion products is supported with first class laboratory and run by expert staffs, which guarantees satisfaction every single time.

What makes Persada Silver different?

WE ARE EXPERIENCED

We have provided many years of customer's rust problem a complete solution.

WE ARE PRECISE

We analyse corrosion problems and create a plan in order to help the company production.

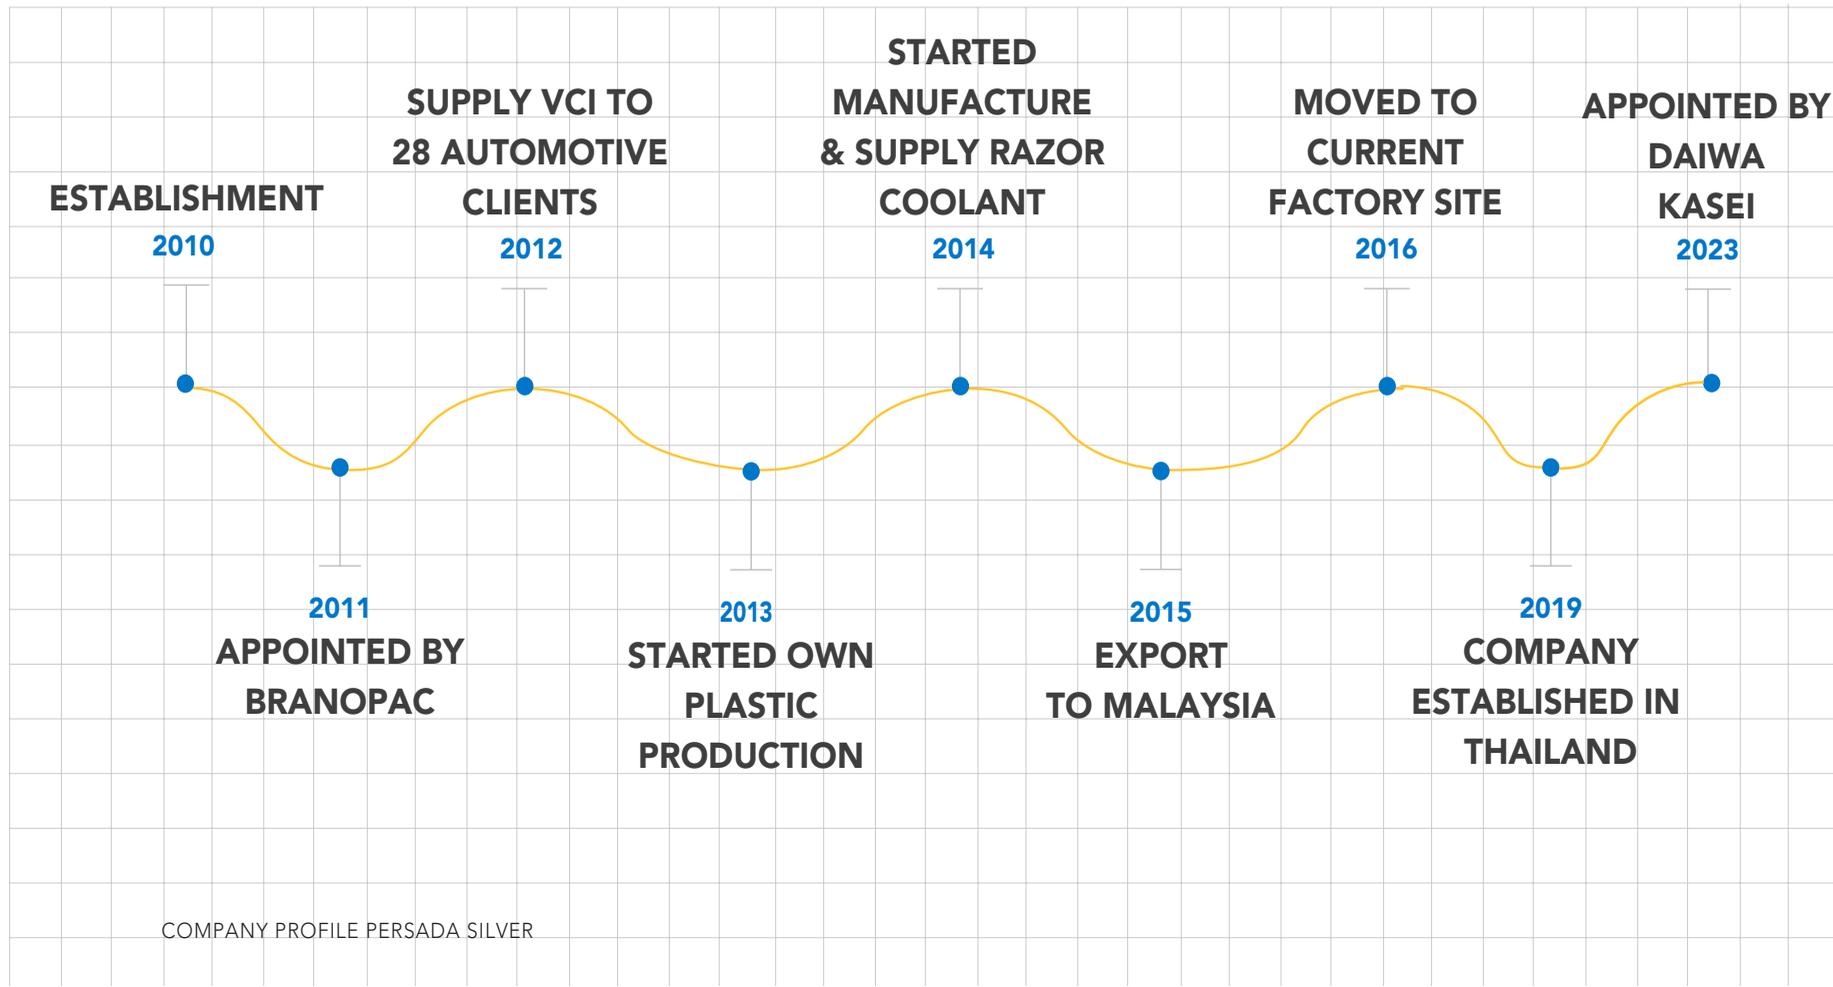

WE ARE COMMITTED

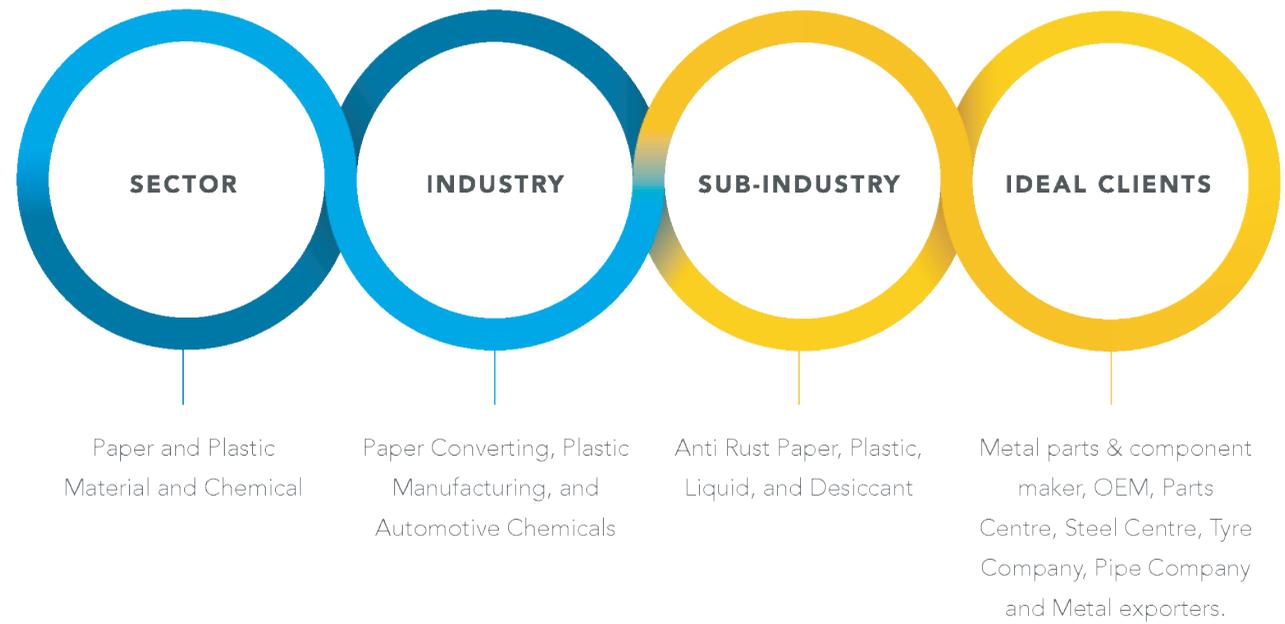

Taking the plan into action, we ensure that the result will be beneficial for our clients

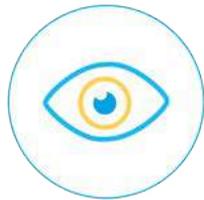

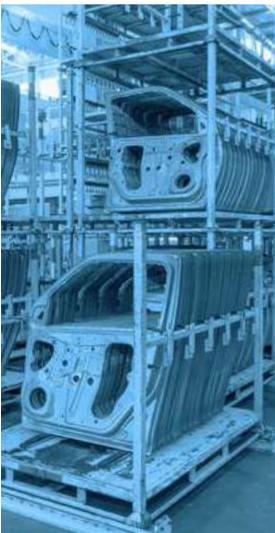

COMPANY HISTORY

**WE STRIVE FOR CONTINUOUS IMPROVEMENT
INSTEAD OF PERFECTION.**

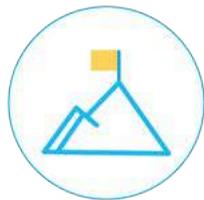

VISION, MISSION, AND VALUE

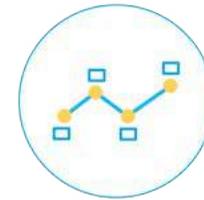

VISION

Creating **continuous improvement and problem solving** on corrosion in manufacturing. Our company presence must be maintained by generations by customers.

MISSION

To focus on **developing exceptional products** which benefit clients to solve the corrosion problems.

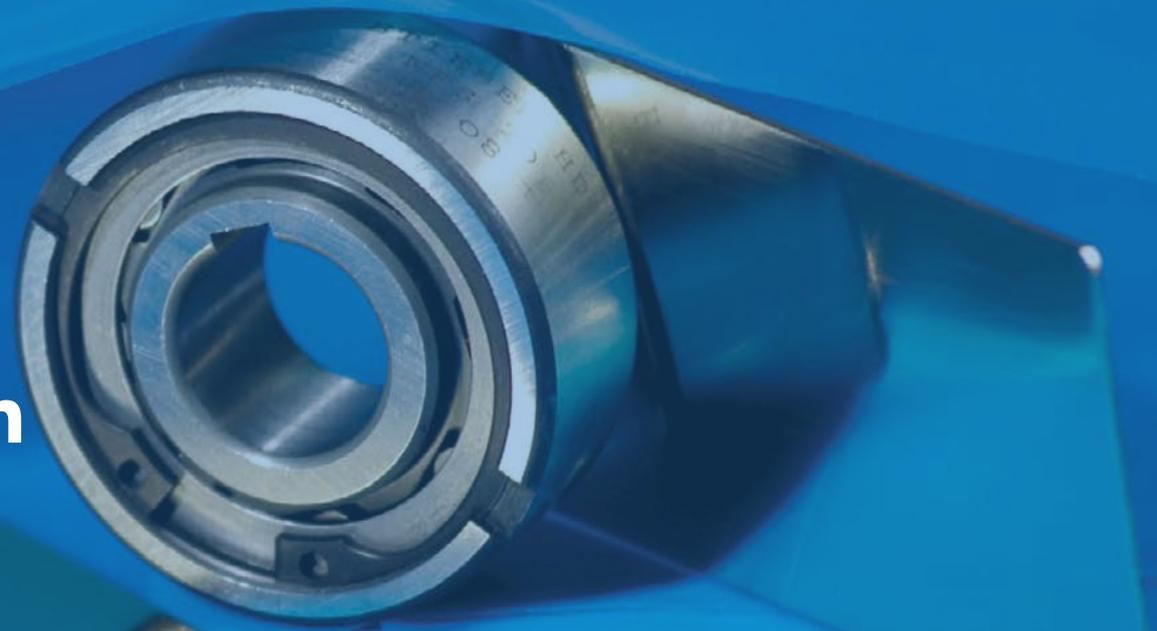

VALUE

Improvement culture to manage individuals in the company.

Managing the business and operation process according to the worldwide standard.

Expanding client's knowledge base with updated information on our business.

To focus on developing exceptional products which benefit clients to solve the corrosion problems.

PERSADA SILVER PRODUCTS

VCI PAPER

VCI PLASTIC

ANTI RUST LIQUID AND COOLANTS

CARGO DESICCANT

1 BRANORost VCI PAPER

We provide VCI paper made in Branopac Germany. VCI stands for Volatile Corrosion Inhibitor. VCI works to inhibit corrosion vapour by forming a thin protective layer on the metal surface inside the enclosed space.

This invisible layer prevents the reaction of metals with moisture that causes corrosion. The VCI vapour will be evaporated when the packaging is opened and user can immediately perform the following steps directly such as painting process or assemble with other components.

BRANORost paper can be used as a full wrapper, interlayer, insert or vaporizer.

BRANOROST

CASTING AND STEEL ARE PROTECTED WELL

FERROGARD

SPCC TO ALUMINUM ARE FREE FROM CORROSION

MULTIGUARD

BRANOCHIP

OUR PRODUCTION CAPABILITY

Paper sheet width:
10mm – 1000mm

Paper length is determined by customer

VCI Paper in pocket format with 15cm width and length adjusted proportionally.

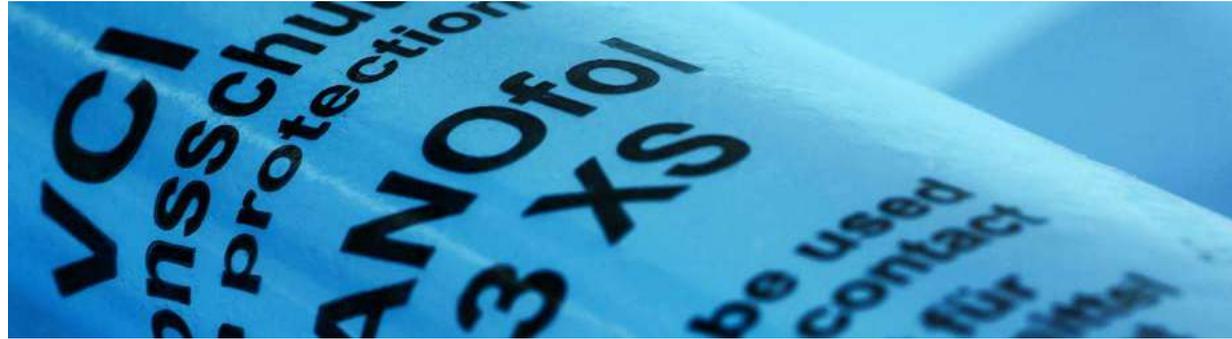

Printed VCI paper with your company logo.

Specific demand paper:
VCI Cardboard / VCI Crepe Paper / White VCI Paper / VCI Shower Caps / TeaBag VCI Concept / HDPE Kraft

Ask for free trial on your site or real shipment with our data-logger recorder.

2 BRANOfol VCI PLASTIC

We produce VCI film locally under Branopac GmbH standard. VCI stands for Volatile Corrosion Inhibitor. VCI works to inhibit corrosion vapour by forming a thin protective layer on the metal surface inside the enclosed space. Our current customers choosing VCI film for transparency, avoid packaging opening in many cases.

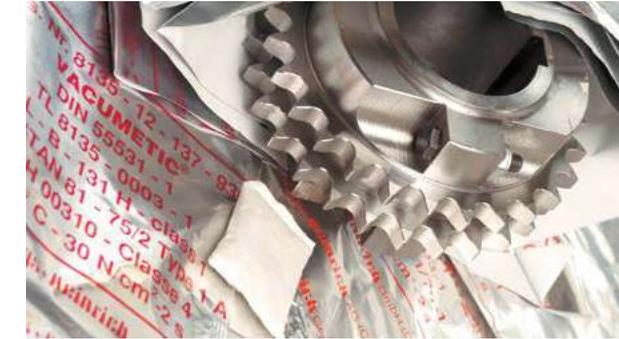

BRANOFOL

The VCI vapour from the film prevents the reaction of metals with moisture that causes corrosion. The VCI vapour will be evaporated when the packaging is opened and user can immediately perform the following steps such as painting process or assembling with other components.

SILVERFOL

Our BRANOfol VCI film can be used as a single wrapper, sack, wrapping the entire material on top of pallets or as a base of parts packaging.

OUR PRODUCTION CAPABILITY

VCI film width:
90mm - 2400mm, tube / half tube

Film thickness:
30micron - 150micron

Pocket format VCI film minimum 90 mm

Printed VCI film with your company logo

3 dimensional products:
VCI gusset bags, VCI Cubical bags, VCI Anti Static Film, VCI Bubble Film, Sealable VCI plastic bag

Ask for free trial on your site or real shipment with our data-logger recorder.

3 RUSTIX ANTI RUST LIQUID AND RAZOR COOLANTS

Cutting Fluid is a perfect example of how small detail can make big difference.

We produce Razor cutting fluid and Rustix Anti Rust Liquid with our own formula to satisfy clients in terms of Cost, Quality and Delivery. Avoid unplanned machine stoppage and higher tool wear by using product and service from Razor.

Free trial is possible under close evaluation from client and Persada Silver.

Razor Cutting Fluid Range:

1. Neat Oil
2. Soluble Oil
3. Semi Synthetic Oil
4. Full Synthetic Oil

Rustix Anti Rust Liquid Range:

- Short to Long Rust Protection Liquid (1 week to 24 weeks)
- Wide range of viscosity
- Unique scent is available to cater your need

RUSTIX

RAZOR

With the right product and close supervision, there are benefits clients may generate:

- Higher cutting speed
- Better dimension accuracy
- Improve metallic particles management
- Reduce wear and increase life of your machine and equipment

Lower your production cost and improve the production output by using the right coolant and anti rust liquid.

Request free trial by log on to Silver.co.id/trial-request or simply call our hotline number

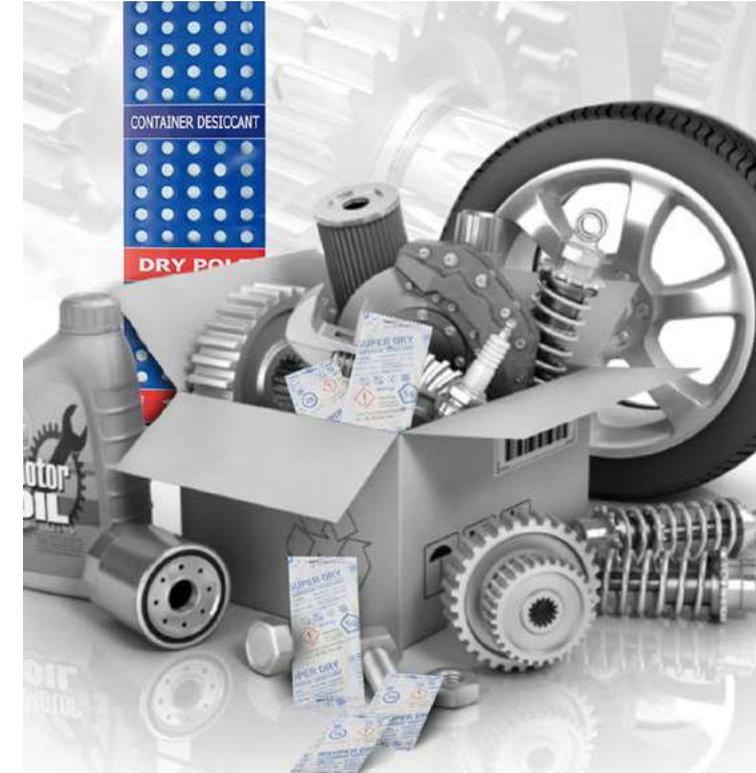

4 SUPERDRY CARGO DESICCANT

During the shipment, temperature and climate changes may lead to container rain and wet the packaging. Persada Silver distributes a world leading brand desiccant: Superdry. Superdry is the most effective natural powder to absorb the humidity in your cargo.

Customer satisfaction is crucial for exporter and you may lose profit because of humid shipment. Superdry has an international reputation to address this issue.

PREVENT MOISTURE INSIDE THE CARGO

Superdry is a desiccant with natural powder material that has moisture absorption ability above silica gel and other desiccant material.

- Absorbs 300% of its own weight
- Active from packing opening to day 90 (T&C apply)
- Moisture is absorbed into the packaging and turned into a jelly
- No leak because it uses a one-way absorbent material and double covered
- Survives temperature -5°C to 90°C (23°F-194°F)
- REACH, non-toxic, DMF-free Certified
- Global network for cargo evaluation on destination
- User training provided on correct amount and placement
- Climatic chamber and data logger is available for shipment evaluation
- Ask for free trial to evaluate your cost and effectiveness
